

GHOST - II

NEXT GENERATION VEHICLE PROTECTION

Protect your vehicle from key theft, with the Ghost II Premium Immobiliser using the very latest technology for CANbus vehicles. This state of the art immobiliser is a stealth system with no visible PIN pads or remotes but instead uses a unique personalised sequence using existing buttons in your vehicle with 4 - 26 possible combinations. Even if a thief were to steal your car key, they wouldn't be able to start your car!

The Ghost is the world's first aftermarket CAN bus immobiliser. Protect your car from theft like nothing else on the market today.

The Ghost protects your car from key-cloning, hacking, and even key theft. The only way a thief could take a Ghost protected car is by physically towing it away, even then they will never be able to drive it! The Ghost has no key-fobs or LED indications to give away its location. The Ghost uses the buttons in your vehicle such as those on the steering wheel, door panels or centre console, to allow you to make a unique, changeable, PIN code sequence that must first be entered before you can drive your car. Just like your credit card but you can make your car PIN even safer by making it up to 20 presses long!

Queensland Vehicle Immobiliser Subsidy Approved

Features

- Immobilisation by communicating with the ECU
- PIN code via buttons on steering wheel / dash
- Undetectable using diagnostics
- Cannot be bypassed using standard theft methods
- No radio frequency signals
- No additional fobs (commercial vehicle option allows for fobs)
- Uses the on-board CAN data network
- Unique user changeable PIN code
- Service / Valet mode means the PIN code is never compromised
- Secure, unique emergency code should the PIN be forgotten
